RE: Thank You

I didn't want the school year to come to a close without taking a few minutes to say thank you and good luck. A little over 3½ years ago I arrived in the Warwick Valley Central School District to continue my career in education. The time I have spent in Warwick has been among the most enjoyable and rewarding times of my career, and for this I thank you all. It is because of your efforts that the school district and its students have had the success they have had both in the classrooms and in extracurriculars. For this you should be proud. I have watched with pride as you as teachers, coaches and mentors have encouraged our children not to settle for mediocrity but to be the best they could possibly be in their endeavors. I have seen so many of you give of your own time, energy and resources to help others. I truly appreciate such efforts. The 2008-09 school year has brought so many successes to individuals, groups and the school district overall. My only regret is that my own personal issues did not allow me to share those successes more closely but still wanted to thank those responsible personally.

While every school year seems to go by quicker than the previous, this year went by even faster. Now as plans are made for next year and whatever it holds for each of you individually, I hope that you can reflect back on the events of this 2008-09 year and smile knowing what was accomplished as a result of your expertise and caring.

For those who share the vocation of working with children, our job is never done, and you never know when the simplest of acts can change the life of a child. Likewise, you never may realize how a simple act can impact a fellow staff member. I can tell you personally that many of your random acts of kindness did impact me personally – and again my thanks.

I want to wish you all good luck in all you attempt/do in the future. May you all have a life full of health, happiness and answers to your dreams. May you enjoy or remember the reason you selected education as a career/vocation. Warwick Valley Central School District is what it is because of the people who are in it. That said, you have to agree that it truly is one of the best places to be.

Thank you all for everything, good luck in all you do in the future and congratulations on all that has been accomplished. Until our paths cross in the future, take care.
